WEST CALDWELL, N.J. (March 1, 2022) – MaxLite, a leading innovator in the LED lighting industry, announces the grand opening of its new state-of-the-art distribution center in Greenwood, Indiana. The new 100,000 square-foot facility, located just outside Indianapolis, doubles the size of its existing facility in the same city and will significantly improve delivery times to customers. It also expands MaxLite’s growing network, with additional distribution centers in northern New Jersey and Anaheim, California.

“We’re excited to open our new facility in Indiana,” said Spencer Bolgard, MaxLite’s President and Chief Executive Officer. “Our investment in this state-of-the-art facility expands our distribution network and reflects our commitment to make it easy to do business with us. We’re also pleased to have grown our footprint in the Indianapolis area, which we’ve found to be an ideal location. We have a great team there, and we look forward to continuing to serve our agents, distributors and customers as well as supporting the local economy.”

In addition, the center will serve as the central hub to store secondary products and solutions from MaxLite’s extensive product portfolio. Located less than two miles from the company’s original facility, it will allow deliveries to customers throughout the continental U.S. in three days or less. Within the central region, customers can expect delivery in 1-2 business days.

In keeping with its focus on green initiatives, MaxLite has outfitted the facility with its energy-efficient linear highbays and innovative c-Max controls. In addition to the energy savings realized from the LED lighting, the control sensors will further reduce energy consumption by only lighting active areas while maintaining safe lighting levels for warehouse associates.
